Pennsylvania Department of Agriculture

Harrisburg

Vol. 14 December 1, 1931 No. 10

General Bulletin No. 507

REPORT OF SEED ANALYSES 1931

John A. McSparran, Secretary of Agriculture

R. H. Bell, Director, Bureau of Plant Industry

Published bi-monthly by direction of the Secretary. Entered as second class matter, March 22, 1918, at the Post Office at Harrisburg, Pa., under the act of June 6, 1900.

P 38.1
13

PENNSYLVANIA DEPARTMENT OF AGRICULTURE

Organization and Services

JOHN A. McSPARRAN, *Secy. of Agriculture* W. S. HAGAR, *Deputy Secy.*

This Department is essentially a service agency created by legislative enactment to deal with administrative regulatory, investigational, and educational problems which can best be solved through public rather than individual action. The organization provides for coordination and cooperation with the Pennsylvania State College and the U. S. Department of Agriculture. The Department operates through the following bureaus:

ANIMAL INDUSTRY: T. E. MUNCE, *Director and State Veterinarian*

Prevents and eradicates transmissible diseases of animals and poultry, including tuberculosis of animals in cooperation with Federal Government;
Demonstrates to veterinarians control methods for transmissible animal diseases;
Supervises vaccination for and the prevention of hog cholera, anthrax, black leg and hemorrhagic septicemia
Protects public from unwholesome meats through ante and post mortem examinations of animals at slaughtering establishments;
Inspects, licenses and furnishes information as to breeding, soundness and conformation of stallions and jacks standing for public service;
Enforces law requiring licensing of dogs and providing for protection of livestock and people from attacks of uncontrolled dogs;
Maintains laboratory for diagnostic research and experimental projects.

PLANT INDUSTRY: R. H. BELL, *Director*

Tests agricultural seeds for purity and germination, and enforces State Seed Law;
Inspects orchards, parks, farms, and plant imports for injurious insects and plant diseases;
Inspects and licenses Pennsylvania nurseries, and licenses all dealers in nursery stock;
Enforces laws governing apicultural practices, disease control and housing;
Places and enforces quarantines and carries on eradication campaigns against insect pests and plant diseases,
Inspects and certifies potatoes for seed purposes;
Makes investigations for the control of injurious insects and plant diseases including field tests of insecticides, fungicides and weed killers;
Maintains collections of insects, plant diseases, plants, and seeds, and identifies specimens.

FOODS AND CHEMISTRY: J. W. KELLOGG, *Director—Chief Chemist*

Accomplishes its purpose of protecting Pennsylvania homes against harmful foodstuffs by sampling, analyzing, and bringing prosecution under the laws relating to foods and non-alcoholic drinks, including milk, cream, butter, ice-cream, eggs, sausage, fresh meats, soft drinks, fruit syrups, vinegar and kindred food products;
Regulates and issues licenses for the manufacture and sale of oleomargarine;
Licenses and regulates egg-opening plants and cold storage warehouses, maintaining regular inspection and enforcing twelve-month storage limit;
Inspects milk plants and creameries and regulates weighing, testing, buying and selling of milk and cream on a butterfat basis;
Protects honest manufacturers, importers, selling agents and ultimate users of feeding stuffs, fertilizers, lime products, linseed oil, paint, putty, turpentine, insecticides and fungicides, by means of annual registrations followed by inspections, analyses, prosecutions and the publication of the analyses of these products;
Analyzes special samples for residents of the State at the rate of $1.00 a sample for feeding stuffs, lime products and linseed oils.

MARKETS: GEO. A. STUART, *Director*

Investigates and assists in the marketing of farm products; at present chiefly grain and hay, fruits and vegetables, poultry and eggs, and tobacco;
Compiles and distributes daily market information as to supplies, shipments and prices;
Advises growers on transportation of agricultural products;
Assists cooperative associations and public markets;
Establishes standard grades of farm products and maintains inspection.

STATISTICS AND INFORMATION: GEORGE F. JOHNSON, *Director*

Assembles and disseminates essential statistics and facts pertaining to the agriculture of the State from monthly reports rendered by hundreds of volunteer crop correspondents, information which assists the producer in his sales and interests all industries which deal with agricultural products;
Cooperates with U. S. Bureau of Agricultural Economics in joint crop and livestock reporting and publishes annual and monthly summaries of the data;
Compiles dates of county and local fairs and assembles data pertaining to their success and results during each year.
Conducts Department's publicity and publications work.

Report of Seed Analyses---1931

Personnel

Laboratory—E. M. Gress, Ph.D., State Botanist; Mary C. Mowry, B.S., Seed Analyst; Helen J. Mowry, A.B., Assistant Analyst; Dolly M. Cameron, Botanical Assistant.

Field inspection work was done by—E. M. Gress, J. K. Thornton, J. F. Hudock, A. W. Buckman, W. E. Phillips, M. C. Strausser, P. G. Brown, and F. L. Holdridge.

INFORMATION FOR FARMERS

Any factor which increases the cost of producing a crop or that reduces the yield is causing a cut in the farmers' profits. Farmers would be astonished if they fully realized the loss caused by sowing poor seed. These losses are brought about in a number of different ways.

1. By sowing seed not adapted to soil and climatic conditions.
2. By sowing seed not well developed and properly matured and stored.
3. By sowing seed of a low percentage of purity.
4. By sowing seed that does not germinate well.
5. By sowing disease infected seed.

First—The variety and source of seed should receive careful consideration. It is a well known fact that some varieties of corn, wheat and other crops will produce a better yield in a given region than other varieties.

Select Adapted Seed

No longer is the animal breeder satisfied with the scrub breeds, but chooses those breeds best suited to his purpose. So should the farmer select the varieties and strains of crops adapted to his soil and climate conditions. He should not be satisfied to sow clover seed grown in the mild, sunny climate of southern Italy and expect it to stand the rigors of the winters of Central and Northern United States.

Second—After deciding upon the variety of seed to be used, the quality should be given serious attention.

A seed is a young plant stored away in a seed coat with sufficient food to give the young plant a start. Other things being equal, the large seed with a greater amount of stored food will give the young plant a better start than the smaller seed with a less amount of food.

A few years ago the Ontario Agriculture College raised on an average for seven years 62 bushels of oats per acre from large seeds and only 47 bushels per acre from small seeds, both being selected from the same stock and grown under exactly the same conditions each year. The difference between 62 bushels and 47 bushels or 15 bushels per acre is clear profit, since the cost of producing the smaller yield would be practically the same as that of the larger yield.

Test Seed for Purity

Third—Seeds should be tested carefully for purity. Perhaps the farmers in Pennsylvania and elsewhere are still sowing wheat that contains garlic. Positive proof of this is found in the wheat that is now going into the Baltimore market. The discount on garlicky wheat ranges from seven to ten cents per bushel. The presence of one bulblet in a sample of two quarts is all that is necessary to cause it to be graded as garlicky.

Another weed seed which causes a discount on wheat is that of cockle, one to two per cent. causing a discount of three cents per bushel, while three to five per cent. will cause as much as eleven cents discount. These two weed impurities in wheat alone are taxing the farmers heavily, and, in addition, are polluting their farms with noxious weeds, which will cause additional losses.

These losses due to impure seeds are not confined to one kind of crop. The seed laboratory of the Pennsylvania Department of Agriculture recently analyzed a sample of red clover seed which a seed firm purchased from a farmer in southeastern Pennsylvania, and which showed more than 50 per cent. weed seeds.

There were present 46 per cent. of buckhorn or narrowleaved plantain seeds, while the remaining weed seeds were made up of many other noxious weeds. The farmer who sold this clover seed was quite indignant because he received less than 50 per cent. of the market price for it; nor did he sell his entire crop, but kept enough for himself and some of the neighbors who are willing to buy on price rather than quality. The injury from sowing such worthless stuff can not be determined, but the loss to the farmer is enormous.

In 1930, 118 samples of oats which had been taken from farmers' supplies of seed oats, evidently nothing but feed oats, were examined in the State seed laboratory. The seed analyst found that only seven samples out of the 118 were entirely free of weeds. One sample contained 25 different kinds of weed seed, or a total of 1,449 weed seeds in four ounces of the oats.

Financial Loss Heavy

Fourth—Another factor which is reducing the farmer's profit is the sowing of seeds that do not germinate well.

Most of the agriculture states have a seed law which requires that seeds sold for seeding purposes shall show on the label the percentage of germination with the date when such germination test was made. There are many factors, none of which can be detected by sight, which bear upon germination. Among these are maturity, when harvested, conditions of drying and storing and age—only a test will reveal the germinating qualities of seeds.

The financial loss caused by poor germination can hardly be calculated. It is evident, however, that a field of corn in which only 80 per cent. of the seed germinated, other things being equal, could not give the same yield as if 100 per cent. had germinated.

Fifth—Still one other factor needs consideration—that of disease-free seed. About six years ago the U. S. Department of Agriculture, in cooperation with some experiment stations, performed some experiments with rather startling results. Seed corn that gave 100 per cent. germination but showed disease infection was matched against seed that showed no infection. The disease-free seed produced from 10 to 30 per cent. better yields than that produced by the infected seed.

State Seed Law Protects

Fortunately, Pennsylvania as well as nearly every other agriculture state has a seed law whose purpose is two-fold: first, to insure a supply of good, clean seeds free from weeds and waste material for farmers' use; second, to protect the honest seedsmen and farmers against the practices of dishonest and careless seedsmen. This is accomplished

by requiring that all seeds sold in certain quantities for seeding purposes shall bear a tag or label giving information as to the purity, germination and the nature and kind of impurities contained.

Farmers should buy from reliable seedsmen located within the Commonwealth of Pennsylvania. Those who buy from mail order houses or other retailers outside the Commonwealth can secure no protection under the Pennsylvania law. The farmer should always examine the tag which bears the analysis of the seed and if the seedsman can not produce a statement of the analysis the farmer should refuse to buy. Quality and not price should be the main factor in purchasing seeds.

While protection is made possible by the seed law, it is obviously impossible for the Commonwealth to force the farmers or seedsmen to accept that protection. Adequate protection can result only from the closet cooperation of farmers and seed dealers with the Pennsylvania Department of Agriculture.

Bad Seed Should Be Reported

Whenever a purchaser of seed discovers that the quality has been misrepresented this fact should be reported promptly to the Department at Harrisburg, and immediate steps will be taken to determine the exact quality of the seed and whether or not it complies with the requirements of the law.

Farmers Not Exempted From Labeling Seeds

No one who sells seeds for seeding purposes is exempt from labeling such seeds. Some states have passed laws exempting farmers from the label requirements, but in general these laws, when put to the final test, have been found unconstitutional. The farmer is the citizen who receives the greatest benefit from the law. He has been greatly injured by dishonest and irresponsible seedsmen. The law now gives him the protection that he has so long desired and needed. There is no reason why he should be exempted. He should not be allowed any more than anyone else to sell bad seed. The thoughtful, careful farmer who wishes to improve his crops by sowing better seeds, and to free his farm of noxious weeds by sowing clean seed does not wish to be exempted, and farmers of the opposite type must not be exempted.

INFORMATION FOR SEEDSMEN

All farm seeds sold, offered or exposed for sale in quantities of ten pounds or more must be tagged. The tag must show the analysis and the percentage of germination, with the date when the germination test was made. The seedsman may deliver the tag to the purchaser, or he may tag the bag or container in which the seeds are exposed or offered for sale. If the former method is used, the seedsman sometimes forgets to deliver the tag to the purchaser. It is better and easier for the seedsman to make sure that the tag is attached to the bag or container in a conspicuous place where the purchaser can see it.

Retailer and Wholesaler

Both retailer and wholesaler within the state are responsible, but the retailer should always demand that the wholesaler shall tag the bag, giving the information required by the Pennsylvania Seed Law. If the retailer suspects that the seed is not properly labeled, or is not of good quality, he should have it tested. He may have this done by sending a sample to a commercial seed laboratory or to the Bureau of Plant Industry, Pennsylvania Department of Agriculture, Harrisburg, Pa.

Information Required on Tag

It is a violation of the Seed Law to sell seeds unless the following information is given on the tag:

1. Common name of seed
2. Percentage of purity
3. Percentage of weed seeds
4. Name and number per ounce of the noxious weeds present
5. Percentage of germination with date when test was made
6. Name and address of the retailer

The requirements for mixtures are somewhat different. (See Sections 5 and 6 of Seed Law.)

Prohibition

It is unlawful to sell the following:

1. Seeds that contain more than 3% weed seeds.
2. Seeds that contain more than one seed of dodder or one seed of Canada thistle in five grams.

Penalty

A violation of the Seed Law is a misdemeanor, for which a maximum fine of $200.00 may be imposed.

Visitations by Inspectors

It is the intention of the Pennsylvania Department of Agriculture to have an inspector visit each seedsman at least once a year. If the bags are properly tagged at all times, the seedsmen will always be ready for the inspector.

PUBLICATION OF ANALYSIS

Any tests, analyses, or information of interest to the public, may be published in reports or bulletins along with the name and address of the person or firm who offers the seeds for sale. The name and address, however, of persons who submit samples of seeds for test or analysis, but who do not offer the seeds for sale, must not be published. For example, a farmer may send a sample of seed to the Bureau for analysis. He wishes to know the analysis for the sole purpose of planting the seed and not for selling. In this case the farmer's name and address must not be published. Since he does not intend to sell the seed there is no advantage in publishing his name and address. However, if the farmer bought the seed from a dealer, the analysis and the name and address of the dealer may be published. The intent of the law is to protect the purchaser of seeds against those dealers who falsely label the seeds which they sell or offer for sale, or who in any way violate the law.

Farmers or persons having definite knowledge of such violations of the law, or having good reasons to suspect that the law is being violated should assist the Department of Agriculture in ascertaining the facts by submitting to the Department such information and samples as they believe to be reliable. Care should be exercised, however, that such information or samples be submitted not with a spirit of revenge, but solely with the best interest of the public in mind.

If the honest reliable seedsmen and farmers and other buyers of seeds cooperate with the Department of Agriculture, the dishonest and irresponsible seedsmen can virtually be forced out of business by injunction and publicity.

RULES AND REGULATIONS GOVERNING THE TESTING OF SEEDS

The Secretary of Agriculture, who is empowered to make necessary rules and regulations for the efficient enforcement of the seed law, has provided that the "Rules for Seed Testing" recommended and followed by the Association of Official Seed Analysts of North America, shall be used. Any citizen of the Commonwealth may send samples for analysis, subject to the following rules and regulations. However, due to rush of work or for any other reason the Department of Agriculture may return the samples and fee without performing the requested analysis and test.

1. Only unmixed seeds named as "agricultural seeds," in Section I, of the seed law will be tested.
2. A fair-size sample should be sent—about 1/8 pound of small seeds, and 1/2 pound of seeds as large as, or larger than wheat.
3. Samples sent by mail or express *must be prepaid,* and enclosed in strong containers.
4. Samples should be sent to the Seed Laboratory, Bureau of Plant Industry, Harrisburg, Pa.
5. Each sample must bear the name of the seed, and the name and address of the sender.
6. A statement must accompany the sample telling what kind of test is desired, whether purity test, germination test or both.
7. A fee of twenty-five cents must accompany the sample. No

test will be made until the fee is paid. *Postage stamps will not be accepted.*

8. A statement should be made whether the seeds tested are for sale, or whether the test is for guidance in planting only.
9. Seeds whose analysis is already known should not be sent for test, unless there is suspicion that the law is being violated, in which case a copy of the analysis given by the dealer should accompany the sample.
10. The name of the Pennsylvania Department of Agriculture must in no way be used for advertising purposes. The test and analysis, however, may be used for labeling purposes.
11. Not more than five samples will be tested in one month for any one person, firm or corporation.
12. Samples should be sent to be tested some time before the seeds are to be planted or sold. It requires nearly a month to make some germination tests.

EXPLANATION OF REPORT

The following tables give the result of the examination and analysis of the samples of farm seeds collected by seed inspectors during the latter part of 1930 and the spring of 1931. The analysis in most cases was not completed, but was carried only far enough to give assurance that the analysis given on the label was correct and within the "latitude of variation" given in the "rules for seed testing." If samples were questionable, the analysis was completed, and if the analysis found differed from that given by any appreciable amount, both were tabulated.

In a complete analysis, information was often given on the label, which is not required by the seed law. This, with other miscellaneous information, has been given in the column headed "remarks." While inert matter, other crop seeds and hard seeds are not required by law to be put on the tag of unmixed seed, it, nevertheless, is information which the purchaser should consider. A small percentage of inert matter, which is broken seeds, chaff, etc., may lower the quality of the seed very little, but the purchaser should remember that he is paying the same price per pound for it that he is for the good seed. Hard seeds are generally good seeds, but sometimes they are so slow to germinate that they may not produce plants that will mature with the crop, and, therefore, may reduce the yield. Other crop seeds may not be very objectionable, but here, as with the inert matter, the purchaser is paying the same price per pound for them that he is for the pure seed. Often these other crop seeds, if they grow, will reduce the quality of the crop, as, for instance, rye in what.

Tables A and B

Table A lists those samples that violated the Pennsylvania Seed Law in some particular. Maybe the seeds were being sold without an analysis, or the tag may not have given all the information required by the law or the seeds may have been mislabeled. In some cases the weed requirements exceeded that allowed by law.

Table B lists all other inspection samples not given in Table A.

In addition to the inspection samples listed in Tables A and B, many other samples were examined and analyzed in the laboratory. These samples are not tabulated since they were sent in by citizens, farmers and seedsmen, and by those connected with other departments of the State Government.

TABLE A—Samples that violate the Pennsylvania Seed Law

Number and Name of Seed Sample	R.—Retailer W.—Wholesaler or Grower		Per Cent Pure Seed	Per Cent Weeds	Per Cent Germination	Remarks
A310009 Alfalfa	D. H. Latshaw, ----------(R) Bechtelsville, Pa.	G.	99.50	0.25	90.00	Inert matter 0.90.
